Drain pump	

None of your dishes need washing by hand any longer, and neither the trays do. Even the largest underplates can be easily introduced in your new D623LK with its useful 45 cm opening. Adjust the time and intensity of the wash to the type of dirt to wash away through the electronically controlled selectable cycles and if you are dealing with particularly stubborn dirt, use the three minute intensive cycle. The D623LK adapts to the space available in your kitchen: the versatility of the project and the wide range of complementary elements makes optimum installation possible in any type of environment with in line or corner solutions; no changes are required and the controls placed on the top side are visible in any configuration. In this way, the traffic flows in the washing area are optimized, without taking up precious space. The advanced technology helps you save*, increasing your profits by over EUR 1,050 per year.
